PROFILE

Motivated and detail-oriented Frontend Developer proficient in HTML5, CSS3, and JavaScript (ES6+), with hands-on experience building responsive and interactive web applications through personal projects. Actively advancing skills in React to create user-friendly, visually appealing interfaces. Eager to apply problem-solving, creativity, and analytical abilities to deliver high-quality web solutions.

PROFESSIONAL EXPERIENCE

- **Frontend Development Projects**

Guess My Number – JavaScript mini game
 -Focused on DOM manipulation, event handling, and game logic.
🔗 Guess-my-number

Omnifood Website – HTML & CSS (Responsive landing page)
-Responsive landing page for a fictional food delivery service called "Omnifood".Device types (desktop, tablet, mobile).
🔗 Omnifood.web

Dice Game
-A simple, interactive two-player dice game built with vanilla JavaScript, HTML, and CSS.
🔗 JS-mini-game

SKILLS

- **Technical Skills:**

Frontend Development: HTML5, CSS3, JavaScript (ES6+, including Promises, Async/Await, DOM Manipulation), Responsive Web Design
Tools & Technologies: Git, GitHub, VS Code
Currently Exploring: React (single-page applications)
, UI/UX Design Principles
Database: SQL (SELECT queries, basic JOIN operations)

- **Soft Skills:**

- Collaborative problem-solving (e.g., group debugging in JavaScript projects)
- Effective communication (e.g., explaining project features to peers)
- Analytical thinking (e.g., optimizing game logic in JavaScript projects)
